If you stop to call the first participant, since you can not record the conference.

This is probably due to a bug in Skype, can not be solved at present.

If you record a conference call, please note that the first participant keep in conference.

Ex)

- 1, The host started the conference call with Mr. A, then Mr.B was added.
- 2, Mr. A was missing, and the host continued to call with Mr.B.
- 3, Case1: can be recorded, Case2: can not.
